

ABSTRACT

In a first aspect, a first method is provided for writing an LRU indicator. The first method includes the steps of (1) activating one of a first word line that
5 corresponds to a first memory array and a second word line which corresponds to a second memory array; (2) employing the first word line, when activated, for writing to the first memory array and for writing the LRU indicator; and
10 (3) employing the second word line, when activated, for writing to the second memory array and for writing the LRU indicator. Numerous other aspects are provided.
